

Plotting Linear Regression estimates

The libraries

```
library(ggplot2)  
library(visreg)
```

The Dataset

mtcars (Motor Trend Car Road Tests)

```
df = mtcars
```

Creating the linear model

```
m <- lm(mpg ~ cyl + disp + hp + drat + wt + qsec,  
        data = mtcars)
```

Model summary

```
summary(m)
```
